

**Decimal Range is a game for two players, using two different coloured counters and 1-6 die. The aim of the game is for players to place three of their counters in a row.**

**Rules:**

- take turns to roll a 1-6 die
- use the number on the die to identify the decimal range using the key below
- cover a decimal number within the identified range, using a counter

As the game continues, players can scan for all the possible options, to try to block their opponent or to look for numbers next to previously placed counters, in order to create a row.
